

# AMELIE SCHMITT

---

INSTITUTION Climate Service Center Germany (GERICS),  
Helmholtz-Zentrum Hereon, Hamburg  
ADDRESS Fischertwiete 1 20095 Hamburg  
TELEPHONE +49 (0) 40 226 338 478  
ORCID [0000-0003-3346-9748](https://orcid.org/0000-0003-3346-9748)

## RESEARCH INTERESTS

---

- exchange processes between the atmospheric boundary layer and the underlying surface:  
over irrigated fields, vegetation in rain forests, or sea ice
- land surface models and regional climate models
- weather impacts on sustainable transportation

## CURRENT POSITION (SINCE 02/2023)

---

PostDoc at GERICS in the Helmholtz Young Investigator Group Uncertain Water Resources under global change (UWaRes, [ms.hereon.de/uwares/](https://ms.hereon.de/uwares/)). Responsibilities include:

- Model development of the regional climate model REMO:  
implementation of irrigation schemes
- Coupling of REMO with the hydrological model CWatM
- Model tuning and testing

## PROFESSIONAL EXPERIENCE

---

2018–2023 PostDoc at the Atmospheric Measurements and Process Modeling Group of the Meteorological Institute, University of Hamburg

### PROJECTS:

- CLICCS A3 - CANOPIES IN THE EARTH SYSTEM
- VERBUNDPROJEKT ATTO: PILOTPROJEKTE - TEILPROJEKT 5:  
SIMULATION OF THE TERRESTRIAL WATER AND CARBON CYCLES IN  
AN EARTH SYSTEM MODEL

### TASKS:

Modeling of exchange processes between land surface, forest canopy and atmosphere within a tropical rain forest using the earth system model ICON and the land surface model JSBACH

2015–2018 PostDoc at the Sea Ice Remote Sensing group of the Institute of Oceanography, University of Hamburg

### PROJECT:

- EU HORIZON 2020: SPICES (SPACE-BORNE OBSERVATIONS FOR DETECTING AND FORECASTING SEA ICE COVER EXTREMES)

### TASKS:

Improving algorithms for sea ice thickness retrieval from the passive microwave sensors SMOS and SMAP

2012–2015 PhD student at the Alfred Wegener Institute Helmholtz Centre for Polar and Marine Research in Bremerhaven (Polar Meteorology section)

#### PROJECT:

- REPRESENTATION OF THE CONVECTIVE ATMOSPHERIC BOUNDARY LAYER IN COLD-AIR OUTBREAKS IN REGIONAL MODELS: A JOINED STUDY BASED ON OBSERVATIONS, LARGE EDDY SIMULATION AND MESOSCALE MODELLING

#### TASKS:

Studying convective processes in the polar atmospheric boundary layer over sea ice leads and during cold air outbreaks: statistical analysis of aircraft measurements as well as model results using a Lagrangian box model and the mesoscale model METRAS

## EDUCATION

---

2012–2015 PhD degree in environmental physics, University of Bremen

2011–2012 BSc in Oceanography, University of Hamburg

2009–2011 MSc in Meteorology, University of Hamburg

2008 Exchange semester at the University of Oklahoma, USA

2006–2009 BSc in Meteorology, University of Hamburg

## STIPENDS AND AWARDS

---

2016 PhD price of the Förderverein des Alfred-Wegener-Instituts

2011 Fritz Prosiegel Stipend of the Studierendenwerk Hamburg

2008 ISAP stipend of the German Academic Exchange Service (DAAD)
